

machtfit GmbH is a startup based in Berlin, using python / the django framework to develop a new standard for workplace health promotion. Through the machtfit-platform, companies give their employees access to a unique marketplace of fitness- and health related activities. machtfit handles all administrative efforts and makes workplace health promotion a piece of cake (or better yet, easy as peeling a banana).

The platform went live in January 2012 and has been making the world a fitter place ever since.

We are currently searching for someone experienced in developing scalable web services. If you want to support us in expanding our platform to a wider audience, get employees all over Germany and beyond fit and healthy we would be more than happy to receive your application.

## Senior Backend Developer (f/m)

### Your Responsibilities:

- Help us build and extend our platform backend
- Develop our infrastructure and internal services
- Contribute your ideas and thoughts on our product
- Take ownership of new products and features
